SUB: Sakar submitted 20 dossiers of oncology product registration across regions covering Switzerland, Bulgaria, Slovenia, Vietnam, Myanmar & Ethiopia

Dear All,

Sakar has started with product dossier submission in anti-cancer segment to overseas countries. It is worth mentioning that Sakar has developed oncology products in its research-driven, API-integrated EU GMP approved finished dosage manufacturing units (oral solids and injections), off-which 19 product dossiers in this category has been prepared for submission in key identified countries worldwide. The molecules in the category have been suitably mapped against high-potential countries.

Meanwhile the in-house technical and regulatory team worked towards firming up of dossiers:

- oral solid dosages undergoing bioequivalence studies from EU approved CROs
- injection products tested for bacterial endotoxin (BET) and sterility, post completion of process validations with stability studies
- reference standards utilized for product development have been procured from Europe
- APIs are with CEP making the formulation dossiers complying to regulations of EU and other regulated markets

The registration clock has started and registration or Marketing Authorisation (MA) once received will open the window for export business opportunity with this value products across Europe, the UK, South & Central America, Africa, MENA & APAC regions.

We thank you for your patience, support and encouragement.

This is for your information, records and meeting the disclosure requirements under the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended from time to time.

Thanking you,

Yours faithfully,
for **SAKAR HEALTHCARE LIMITED**
